Hints on Making and Caring for Lawns

A lawn of Jackson's Fancy Hulled Bermuda Grass

Houston is noted for its beautiful lawns and so few people appreciate that a winter lawn can be made to look as attractive as a summer lawn, and be green the entire winter. So do not let another winter go by with that old, dead grass on your lawn. Jackson's Winter Grass is a good winter grass and stays green all through the winter.

Bermuda Grass

FANCY HULLED BERMUDA GRASS SEED. This is the new quick germinating seed. We are now able to offer you this wonderful grass in the hulled seed. This operation hastens germination, as the hulled seed will germinate in eight to ten days from time of planting and will prove to be a boon to new home builders who wish to establish a new lawn in a minimum of time. Using seed is so much less expensive than sod, can be sown in spring, summer and fall using one pound to a space 10x40 ft. 1 lb., 90c; 5 lbs., \$4.00; 10 lbs., \$7.50, postpaid. Write for prices in larger quantities.

BERMUDA GRASS. This is the regular unhulled variety of Bermuda Grass seed. Sow in the spring of the year when ground becomes warm or anytime in the summer, using 1 pound of seed to a space 10x40 ft. The seed will germinate very readily when the weather is warm by sprinkling every day, as plenty of water is necessary. 1 lb., 75c; 5 lbs., \$3.00; 10 lbs., \$5.00, postpaid. Write for prices in larger quantities.

KENTUCKY BLUE GRASS. Suitable in some places in Texas and very desirable for sowing under trees. Lb., 65c; 5 lbs., \$2.25; 10 lbs., \$4.00, postpaid.

JACKSON'S LAWN GRASS MIXTURE. This special mixture produces a beautiful and permanent lawn. It is made from our own formula and composed of grasses which are adapted to the purpose of producing a turf which retains its rich green color and velvety appearance throughout a long season. Lb., 75c; 5 lbs., \$3.25, postpaid.

CARPET GRASS. Used as lawns in some sections, seed is difficult to make germinate when planted without clovers or other grasses. Lb., 75c; 10 lbs., \$7.00, postpaid. Write for prices in larger lots.

JACKSON'S WINTER GRASS (Domestic Rye). This is the foremost winter grass and the foundation of all winter lawn mixture, and we know of no better grass for winter lawn. Should not be planted until the weather is cool, at it will not germinate in the hot months. Plant seed using one pound to a space 10 by 10 feet. It is easy to grow and makes one of the most wonderful lawns with that beautiful green, velvety cast, such a contrast to other vegetation that is dead for the winter, which surrounds most lawns. The seed should be broadcast, following same with thin coating of dirt, then wetting it down, and in a few days the seed will begin to germinate. Just for your own satisfaction, seed your lawn down this winter in Winter Grass. 1 lb., 25c; 10 lbs., \$1.60. Not prepaid, 50 lbs., \$5.00; 100 lbs., \$9.00.

RED TOP. This variety of Winter Grass has been used in the North for years, and until recently it was never planted in Texas, but is now a very popular Winter Grass. It is used extensively in mixtures and on most all golf links. A fine variety for shady places. A mixture of English Rye and Red Top makes the best winter lawn mixture you can buy. Use at the rate of one pound to a space 10 by 25 feet. Lb., 65c; 5 lbs., \$2.25; 10 lbs., \$4.00, postpaid. Write for prices in larger quantities.

WHITE CLOVER. Also called "White Dutch Clover." This is the small, low-growing Clover that is so much desired for lawns; nothing is more beautiful than a little White Clover dotting a beautiful green lawn here and there. Used extensively in lawn mixtures. Lb., 90c; 5 lbs., \$4.00, postpaid.

ST. AUGUSTINE GRASS is the shady nook grass that grows around Houston. Some of the finest homes have lawns from the St. Augustine Grass, obtained in roots or stolens only, as it does not seed in commercial quantities. We have the stolens in bushel baskets of about 100 little squares, this will seed an area 10x10. Write for prices.

SULPHATE OF AMMONIA. A stimulant for lawns, 50 lbs., \$1.75; 100 lbs., \$3.00, f. o. b., Houston.

NITRATE OF SODA. 50 lbs., \$1.75; 100 lbs., \$3.00

BONE MEAL. Ground bone or Bone Meal is very necessary to all lawns; it should be the foundation of lawns. It takes about six months to decay, but when it does, it adds the required life that all lawns need. Lb., 10c; 10 lbs., 60c; 50 lbs., \$1.95; 100 lbs., \$3.25, not prepaid.

GRANULATED PEAT MOSS (horticultural grade). Excellent for top dressing on lawns, fine for flower beds as a mulch, as it keeps out the heat and cold and improves the soil. Write for prices.

Jackson's Novelties and Specialties in Flower Seeds

Scabiosa Imperial Giants Blue Moon

The flower of this new Scabiosa is very different from the old type, instead of a flower composed of a few rows of broad petals surmounted by a flat pincushion like top of small petals, this new type has flowers composed entirely of broad, heavy, wavy petals, eliminating the pincushion center entirely. Because of this complete doubleness, the flowers are of course extremely large and deep, $2\frac{1}{2}$ inches across and 2 to $2\frac{1}{2}$ inches deep, about the shape of an old fashion beehive. The color is a rich deep lavender blue, a shade which maintains its effectiveness indoors and out. Long stems and excellent for cutting. Price: Pkt., 25c; 5 for \$1.00, postpaid.

Stokesia Cyanea

STOKESIA CYANEA (Cornflower Aster). This is not new but is a rare and beautiful hardy perennial. One of the choicest subjects for the perennial border and indispensable for cutting. Pkt., 15c; 2 pkts., 25c.

Tithonia Speciosa Grandiflora Fireball

Dazzling as a ball of fire, poised high above other flowers, Fireball is, undoubtedly, the last word in brilliance of color in a fall blooming plant. Many have known and enjoyed Tithonia Speciosa (Aztec Daisy) and have considered it the brightest flower for fall use. With the introduction, however, of Fireball, this older variety is entirely overshadowed. Fireball is a very brilliant, vibrant shade of scarlet orange, the petals in dazzling contrast to the clear yellow center. The gaily colored flowers are single, very large, four to five inches in diameter and are carried on fine long stems. The plants are rather tall, however, they do not become ragged looking as in the older type. It is extremely showy in the garden and an excellent cut flower variety, the flowers keeping from five to six days when cut. Pkt., 25c; 5 for \$1.00.

Virginian Stock

VIRGINIAN STOCK (French Forget-me-not). French Forget-me-nots are fast growing, early flowering little plants for spring use in the annual rock garden or as an edging plant. They are in flower with such early blossoming varieties as alyssum, pansies, violas and linarias. As they come before the nemesias, they could very well be used in the space to be filled by them. They are charming when grown in mixture. Mixed only. Pkt., 10c; 3 pkts., 25c.

Marigold Tagetes

Datura

DATURA (Trumpet Flower). A handsome ornamental annual easily grown, having large showy white flowers. Excellent to be planted in the background as the bush grows about 3 feet tall, flowering continuously throughout the summer. Pkt., 15c; 2 pkts., 25c.

TITHONIA FIREBALL

Double Rose Morning Glory

DOUBLE ROSE MORNING GLORY. An early free flowering, clear deep rose, double flowered morning glory which makes a quick growth, well covered with flowers. As the flowers are double they give the appearance of being open even after the others in the garden have closed for the day. An excellent combination with the Blue Mexican Morning Glory. Pkt., 15c; 2 pkts., 25c.

Tagetes

TAGETES (Marigold). We are proud to offer the little Giant Tagetes as the highest development yet attained in this pretty little Marigold, with slender fern-like foliage and an abundance of dainty, single golden dwarf, having a spread of 8 to 10 inches, orange flowers on plants which are very excellent for cut flowers. Pkt., 15c; 2 pkts., 25c.

Venidium

VENIDIUM. A new Daisy from Africa, growing 2 to 3 feet high, having a grayish silky foliage with numerous orange flowers, which are marked with a purple black zone averaging 4 to 5 inches across. Treat as a half hardy annual, and plant in a sunny location. Pkt., 25c.

Scabiosa—Blue Moon

Verbena Hybrida Grandiflora Crimson Glow

Verbena Crimson Glow is the finest and deepest red shade available in this popular garden flower. Rich, glowing crimson, the flowers are a solid mass of color, making a striking bed or border in the garden. Unlike other red verbenas varieties, there is no contrasting lighter eye to detract from the color tone. Individual florets are of good size, about an inch in diameter, carried in full clusters which are freely produced throughout the summer weeks. For a brilliant, intense crimson accent in the garden, use CRIMSON GLOW. Pkt., 15c; 2 pkts., 25c.

Verbena

VERBENA BEAUTY OF OXFORD HYBRID. For many years the non-seeding variety of Beauty of Oxford has been a favorite verbenas. This new strain is the nearest approach in a seeding variety to the bright deep rose pink shade of Beauty of Oxford. The individual flowerets measure over 1 inch in diameter, they are half as large again as Beauty of Oxford and will easily cover a silver dollar. The foliage is a dark green. This beautiful verbenas will be welcomed as a distinct addition to the verbenas family. Pkt., 25c; 2 pkts., 45c.

LAVENDER GLORY VERBENA. Mammoth verbenas, Lavender Glory. Here we have a new color, being true lavender, with a creamy white eye. Plant A Home Garden For Economy

Live at home this year and laugh at Old Man Depression. Any home that has a plot of ground 50x50 feet can produce enough by canning and storing, to supply a family of 4 or 5 with enough delicious vegetables to last throughout the entire year. Asparagus—Washington

Asparagus

It is of Chinese origin and one of the best vegetables emanating from that source. It is also absolutely rust-proof. Pkt., 10c; oz., 20c, postpaid.

A very early, round-podded bean for market gardeners as well as home gardeners; the fleshy round pods hang thickly on the plants, and are of a fine flavor, stringless and free from rust; the pods are of a beautiful lemon-yellow, larger than those of Wardwell's, which matures at the same time. Pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid.

Don't Buy Complexion, Eat It, Chemists Say

The home garden is no friend of the beauty specialist where complexion is concerned, scientists tell us, because the properly balanced diet containing vitamin and mineral fresh vegetables will give nature its chance to do what was intended, bring health to the body, and with it, a good complexion.

Vegetables are not the only foods to produce such results, of course, but they are the "deficiency" types which supply the hidden food elements lacking in so many other modern table delicacies. The fact that they are grown at home and can be used fresh from the garden without the loss brought about by being kept out of the ground, makes them doubly valuable for the health and complexion seeker.

Beans—Giant Stringless

Beans—Improved Golden Wax

Pole Snap Beans

Pole Beans require more care and labor than Bush Beans, but bear usually for a longer period than the dwarf sorts and are generally more productive; they are more sensitive to cold and wet than the dwarf varieties. Plant in hills 2 to 3 feet apart, 3 or 4 beans to every hill. One-half pound to 100 feet of row; 30 pounds to the acre.

IDEAL MARKET POLE SNAP BEAN. For the past five years this bean has made a wonderful hit with the truckers and market gardeners around New Orleans. It is claimed to be the best Pole Bean in existence. It is very thrifty and very prolific, yielding better than all other varieties of Pole Beans. It is fully ten days to two weeks earlier than any other variety of green podded Pole Beans. Pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00, postpaid.

Mangels or Stock Beets

ATTENTION!

FARMERS AND STOCK RAISERS

Too much cannot be said about this wonderful feed and every dairy and every farm and every stock raiser should have at least an acre or two of Stock Beets—the returns will be surprising. Sow in the fall and spring, give the ground thorough cultivation. After first cultivation, thin out, so as to stand 6 inches apart in the row, then cultivate same as you would corn. Sow 5 pounds to the acre, in rows $2\frac{1}{2}$ feet apart.

MAMMOTH LONG RED. No other variety of Mangels can compare with this in yield. It grows well above the ground, is easily harvested; the deep red roots are strong, well formed and solid. Jackson's Imported Wong Bok or Chinese Cabbage

This wonderful variety produces a beautiful, crisp, celery-like head that bleaches easily. As a salad it rivals the finest lettuce grown; when cooked like spinach or cabbage makes excellent "greens." Sow seed in any good soil, making the rows 24 to 38 inches apart and thinning to 12 inches apart in the rows. It will not stand frost, so sow early in the fall and again in the spring. Be sure and try some of this wonderful variety, as it is easy to grow. Pkt., 10c; oz., 35c, postpaid.

Culture: Sow seed early in January in hotbeds and transplant out in the open the last of February and March, or later varieties can be sown in the open in March and April; then again cabbage can be sown in cold frames, usually beginning in July. Cabbage plants should be set in rows 18 to 24 inches apart according to the size of the varieties. If cabbage worms infest your crop, try Slug shot or Garden Guard. One ounce of seed will produce 1,000 plants or one pound of seed to the acre.

Bermuda Onion Plants

The usual manner of growing green Onions has, in the past, been by planting sets, but various tests have been proven that the Onion plant is preferable. The set has to be absorbed by the new growth before it begins to form the new Onion, whereas the plant begins to grow as soon as it is planted and makes more headway than the set, producing delicious young Onions for table use during the winter and spring. Onions grown from plants are larger and do not run to seed in the spring like sets. Onions like rich soil, so the ground should be liberally fertilized. Plant in rows about 15 inches apart and 3 or 4 inches apart in the row. 100 for 25c; 200 for 45c; 600 for \$1.00; 1,000 for \$1.50; crate of 6,000 for \$4.00, all postpaid to you.

Jackson's Prize-Winning Dahlias

Jackson's Dahlia Roots for South Texas

CULTURE. We are learning each year more about the culture of dahlias in this section and some of the exhibits at the flower shows this fall of home grown dahlias were almost as large as those raised in the dahlia section. Spade your soil deep, plant the bulb flat. After the plants are up out of the ground it is a good plan to place about one-half inch of mulch about the base of the plant. This will hold moisture in the soil except in extremely dry weather. Lawn clippings, peat moss and even straw or hay will make a good mulch. If you feel that the soil is weak and lacking in quality, it is a good plan to rake in a little bone meal before the mulch is applied. Don't let the ground get a hard crust. In watering dahlias, don't try to overdo it. Just replace the normal amount of moisture in the ground.

BLUE TRAIN. The color of this formal decorative dahlia is a beautiful bluish purple. A healthy and strong grower, producing flowers of great merit. Truly an honor roll dahlia. Price per tuber, \$1.00, postpaid.

Our bulbs are all bright A-No. 1. In the march of time, we have eliminated the old varieties and it behooves every one to plant the new prize winners, more especially when they can be obtained from us at prices lower than others charge for the old type.
